PROFESSIONAL SUMMARY

Engineer who has taken a product from an empty repository to its first restaurant onboardings. At Entugo, a B2B loyalty SaaS, owned the architecture (six services, four portals, multi tenant PostgreSQL), the infrastructure (Linux server, Docker, CI/CD) and the engineering process, and led a 3 engineer team while still writing the hard parts. Before that, years of shipping independently: 15+ freelance projects delivered on time and a production institutional site serving 500+ users. Comfortable being the person who picks the stack, sets the standard and is accountable when it breaks.

TECHNICAL SKILLS

Leadership: Team lead for 3 engineers, service contract design, code review standards, roadmap to architecture translation

Architecture: Microservices, API Gateway, multi tenant SaaS, RBAC design, domain modelling, monorepo strategy

Languages: TypeScript, JavaScript, Python, SQL

Backend: Node.js, Express.js, NestJS, REST and GraphQL APIs, background jobs, rate limiting

Frontend: React.js, Next.js, React Native, Tailwind CSS, ShadCN UI, design systems

Data & Payments: PostgreSQL, Prisma ORM, Redis, MongoDB, Stripe (subscriptions, webhooks, refunds), Razorpay

Infrastructure: Docker, Docker Compose, GitHub Actions, CI/CD, Nginx, Linux, Cloudflare

Quality: Vitest, Cypress, integration and unit testing

EXPERIENCE

Software Engineer (Technical Lead)

Nov 2024 - Present

Entugo LLC

Remote

- Took the platform from zero to production: chose the stack, designed a six service architecture behind a centralized API Gateway (around 200 endpoints), and shipped four portals (restaurant, customer, forms, admin) as a multi tenant SaaS now onboarding its first restaurants in Berlin.
- Led a 3 engineer team and defined the service contracts and module boundaries they built against, so services and portals could be developed in parallel.
- Built the QR based loyalty workflow (review gated coupons, point allocation, redemption), the core flow the product is sold on.
- Owned revenue infrastructure: Stripe subscriptions, webhooks and refunds with idempotency and retry logic, plus Razorpay.
- Built the engineering baseline the team runs on: a TurboRepo monorepo with a shared Prisma client, Docker based deploys with GitHub Actions, and a 551 case Vitest suite (29 integration and 12 unit files) that runs in about 71 seconds.
- Worked directly with the founders on scope and sequencing, translating product direction into architecture decisions and delivery plans.

Junior Developer

Apr 2023 - Aug 2024

Newwton LLC

Remote

- Owned production front end work end to end, from Figma handoff to cross browser performance, including Three.js and GSAP components rebuilt to remove animation stutter on low end devices.
- Fixed auth token and distributed state defects causing intermittent failures in the CrypTag NFC product, and hardened its Python tag validation backend.

Freelance Web Developer

Jul 2021 - Mar 2023

Fiverr

Independent, Remote

- Ran an independent practice while completing a Diploma: sold, scoped, built, deployed and supported 15+ client applications across e-commerce, services and portfolio.
- 100% on time delivery and a 5.0/5 client rating across all engagements.

PROJECTS

ENTUGO | React, TypeScript, Node.js, PostgreSQL, Prisma, Redis, Docker, Stripe, entugo.com

- Multi tenant restaurant loyalty SaaS: Auth, Payments, Points, Referrals, Notifications and Cron services behind an API Gateway, with Redis backed queues, JWT and OAuth, RBAC, and Dockerized deployment on a Linux server.

GPS College Official Site | React, PHP, MySQL, REST APIs, gpsakoli.ac.in

- Shipped and still serving 500+ students and faculty, with media management and a custom admin dashboard for faculty and course content.

EDUCATION

B.Tech, Computer Science (Minor in IoT)

Aug 2024 - May 2027

Government College of Engineering, Amravati

Diploma, Computer Science

Jul 2021 - Jun 2024

Government Polytechnic, Sakoli

89.37%

ACHIEVEMENTS

- 1st prize, institute coding competition, Government Polytechnic Sakoli.
- Selected for national level hackathons, CMR Hyderabad 2.0 and 3.0; led the programming team through both.
