PROFESSIONAL SUMMARY

Full stack JavaScript and TypeScript engineer with 3+ years building and shipping end to end web applications: React and Next.js front ends, Node.js and NestJS back ends, REST and GraphQL APIs secured with OAuth and JWT, PostgreSQL and MongoDB data layers, and Docker based deployments automated with GitHub Actions. Led a 3 engineer team at Entugo, works in Agile cycles, writes tested code and takes features from design to production.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML5, CSS3

Frontend: React.js, Next.js (App Router, SSR/SSG/ISR), Tailwind CSS, ShadCN UI, Bootstrap, Three.js, responsive design

Backend: Node.js, Express.js, NestJS, REST APIs, GraphQL APIs, Microservices, API Gateway, Background jobs

Auth & Security: OAuth 2.0, JWT, RBAC, API keys, session management, bcrypt, OWASP Top 10 awareness

Databases: PostgreSQL, MySQL, MongoDB, Redis, Prisma ORM

DevOps: Docker, Docker Compose, GitHub Actions, CI/CD, Nginx, Linux, Vercel, Git

Payments: Stripe (subscriptions, webhooks, refunds), Razorpay

Testing & Practices: Vitest, Jest, Cypress, unit and integration testing, Agile, code review, TurboRepo monorepo

EXPERIENCE

Software Engineer

Nov 2024 - Present

Entugo LLC

Remote

- Architected a six service backend (Auth, Payments, Notifications, Points, Referrals, Cron) behind a centralized API Gateway, enabling independent scaling and single point RBAC enforcement across four portals.
- Built responsive React and Next.js dashboards and customer portals in TypeScript and Tailwind CSS on a reusable component architecture spanning the Client, Customer, Forms and Admin products.
- Integrated Stripe subscriptions, webhooks and refunds with idempotency handling and retry logic, plus Razorpay.
- Led a 3 engineer team and formalized service contracts and module boundaries across around 200 API endpoints, so services could be built in parallel.
- Set up Docker and Docker Compose based deployment on a Linux server with GitHub Actions automation.
- Structured a TurboRepo monorepo with a shared Prisma client, removing duplicated boilerplate across services and portals.
- Wrote an automated suite of 551 automated test cases across 41 Vitest files (29 integration, 12 unit), running against a dedicated PostgreSQL test database in about 71 seconds.

Junior Developer

Apr 2023 - Aug 2024

Newwton LLC

Remote

- Integrated REST APIs across 3+ core React features, resolving auth token edge cases and distributed state issues causing intermittent UI failures in the Cryptag NFC workflow.
- Engineered performance optimized Three.js 3D components, eliminating animation stutter on low end devices and ensuring cross browser consistency.
- Hardened a Python NFC tag validation backend by strengthening input verification logic.

Freelance Web Developer

Jul 2021 - Mar 2023

Fiverr

Independent, Remote

- Ran a solo freelance practice end to end alongside a full time Diploma: client scoping, build, deployment and post launch support.
- Delivered 15+ client web applications with 100% on time delivery and a 5.0/5 client rating across all engagements.

PROJECTS

ENTUGO | React, TypeScript, Node.js, Express, PostgreSQL, Prisma, Docker, Stripe

- Multi tenant SaaS for restaurants with Client, Customer, Forms and Admin portals covering loyalty, referrals, review generation and marketing automation, built on microservices behind an API Gateway with JWT/OAuth and RBAC.

MEDILINK | Next.js, Node.js, PostgreSQL, Prisma, Clerk, Razorpay

- Digital health records platform with Clerk authentication, protected route enforcement, Prisma relational models and Razorpay payments, live at medilink.gladcode.in.

GPS College Official Site | React, PHP, MySQL, REST APIs, gpsakoli.ac.in

- Production institutional site serving 500+ students and faculty with RBAC, media management and a custom admin dashboard.

EDUCATION

B.Tech, Computer Science (Minor in IoT)

Aug 2024 - May 2027

Government College of Engineering, Amravati

Diploma, Computer Science

Jul 2021 - Jun 2024

Government Polytechnic, Sakoli

89.37%
