## PROFESSIONAL SUMMARY

Cross platform mobile and full stack engineer with 3+ years in TypeScript. Built a React Native and Expo travel app on Firebase covering itinerary planning, expense tracking and multi user chat, and an installable PWA for a health records platform. On the backend, owns exactly what a mobile client depends on: JWT, OAuth and OTP authentication, REST and GraphQL APIs behind a single gateway, notification services, and Stripe billing. Looking for mobile product work where one person can own the app and the API behind it.

## TECHNICAL SKILLS

**Mobile:** React Native, Expo, Firebase (Auth, Firestore, Storage), real time sync, Progressive Web Apps, Android and iOS responsive layout

**Languages:** TypeScript, JavaScript, Python, SQL

**App architecture:** Component architecture, Redux, Context API, reusable UI libraries, offline friendly data flows

**APIs & Data:** REST, GraphQL (NestJS), PostgreSQL, Prisma, Firestore, MongoDB, Redis

**Auth & Payments:** JWT, OAuth 2.0 (Google), OTP flows, RBAC, Clerk, Stripe, Razorpay

**Backend:** Node.js, Express.js, NestJS, microservices, API Gateway, background jobs, notification services

**Web:** React.js, Next.js, Tailwind CSS, Three.js, responsive design

**Tooling & Delivery:** Git, GitHub Actions, CI/CD, Docker, Vitest, Cypress, Figma

## EXPERIENCE

### Software Engineer

Nov 2024 - Present

Entugo LLC

Remote

- Built the customer facing portal in React and TypeScript as a mobile first interface, the surface diners use on their phones after scanning a QR code at the table.
- Owned the Auth service behind it: JWT and Google OAuth, OTP verification flows, session management and RBAC, exposed as a client agnostic contract a native app can consume.
- Built the Notifications service on async job queues with retry and backoff, delivering transactional and campaign email to end users through SendGrid.
- Architected a six service backend behind a centralized API Gateway so client applications talk to one surface instead of six separate services.
- Integrated Stripe subscriptions, webhooks and refunds with idempotency handling, plus Razorpay.
- Led a 3 engineer team and set up Docker and GitHub Actions delivery, backed by a 551 case Vitest suite across the backend.

### Junior Developer

Apr 2023 - Aug 2024

Newwton LLC

Remote

- Engineered performance optimized Three.js components with improved render state management, eliminating animation stutter on low end devices, the same frame budget discipline mobile rendering demands.
- Integrated REST APIs across 3+ core React features, resolving auth token edge cases and distributed state bugs in the CryptTag NFC workflows.

### Freelance Web Developer

Jul 2021 - Mar 2023

Fiverr

Independent, Remote

- Ran a solo freelance practice end to end alongside a full time Diploma: client scoping, build, deployment and post launch support.
- Delivered 15+ client web applications with 100% on time delivery and a 5.0/5 client rating across all engagements.

## PROJECTS

**Trazo Travel App** | React Native, Expo, Firebase, TypeScript

- Cross platform app for itinerary planning, expense tracking, multi user chat and traveller connections, built with React Native and Expo on Firebase Auth, Firestore and Storage for real time sync.
- Took the client from prototype to a working, launch ready MVP, with reusable components tuned for both Android and iOS.

**MEDILINK** | Next.js 15, React 19, TypeScript, PWA, medilink.gladcode.in

- Patient and doctor dashboards, digital prescriptions and document access, installable as a Progressive Web App and secured with JWT, RBAC and OTP verification.

**Restaurant Menu Management System** | NestJS, GraphQL, PostgreSQL, TypeScript

- Typed GraphQL API for menu browsing, category creation and filtering, giving clients a single flexible query surface instead of many REST round trips.

## EDUCATION

**B.Tech, Computer Science (Minor in IoT)**

Aug 2024 - May 2027

Government College of Engineering, Amravati

**Diploma, Computer Science**

Jul 2021 - Jun 2024

Government Polytechnic, Sakoli
